South India's first ISI certified water purifier company

Bonding Business Relations for Better Health

Introduction

Divyank Industries Private Limited is the brain child of technocrats and experienced professionals who are focused in delivering superior quality of water purifiers for home and commercial purpose across the globe. Himajal's state of the art manufacturing unit researches, develops and refines water purification with high standards of quality and hygiene in sterile environment and tested thoroughly at our QC lab.

“Evolving & Emerging with Standards to Reach Everyone’s Needs”

Our Vision

Our vision is to use technology and innovation in making mankind life better, by providing the finest water solution to our consumers. We believe in making every house hold use Alkaline water and stay healthy.

We believe in impacting Indian market by serving 1 million consumers use Alkaline water purifiers by the year 2027 by providing exceptional innovative products, build strong relationship with our business partners & make our employee excel in this endeavor.

Our Mission

Our Values

We strongly nurture the belief in producing high quality performing products, backed by strong innovation & new technology, making it eco-friendly and convenient to our consumers. We believe in Quality / Performance & Customer Satisfaction.

Pure & Healthy water parameters

Alkaline water improves your body pH level

Alkaline water helps balance our body pH, which has the tendency to become acidic in nature because of wrong consumption of acid diet, excessive stress and exposure to environmental toxins. The safe pH level between 7 to 8.5 which is safe to consume, make alkaline water a perfect choice than to RO water. Regular consumption of alkaline water not only helps in increasing your immunity, it also helps us to feel fresh, energetic and active.

The process of making normal water alkaline ensures it removes all the negative oxidation reduction potential present in the water. The lower the ORP, the water becomes extremely beneficial as an effective antioxidant for the body.

Water Consumed by Organs

Himajal Purifier gives healthy water

Disadvantages of Acidic RO Water

Reverse Osmosis Process (RO) removes 95-99% beneficial Calcium and Magnesium present in water. Constant consumption of such water has definite adverse influence in human organs as well as on animals. RO Water is acidic in nature, hence its bad for health.

Alkaline Water Health Benefits

Regular consumption of alkaline water is strongly recommended considering today's lifestyle. Alkaline water helps human body improve immune system, delays skin aging, increases bone strength, counters acidity issues, aids diabetes treatment, regulates blood pressure, reduces body weight and improves health of your heart.

As alkaline water has higher pH level that makes water turn into natural state, it is ready for immediate consumption. Besides health benefits, consumption of alkaline water help in skin relate issues. Apart from keeping the system hydrated, consumption of alkaline water improves overall growth of any human body.

Alkaline water contains all required minerals like Calcium, Potassium, Magnesium which are required for healthy human body.

Benefits of Alkaline Water

Purification Process

With years of in-depth research and development, Himajal introduces a state of the art purification process that includes Anti Oxidant Alkaline + RO + UV + UF stages which collectively purifies water from the toughest impurities. On the other end Anti Oxidant Alkaline technology maintain the pH and reduce the ORP level by adding important minerals required for strong human immunity and anti-aging.

**Multi stage
purification with
14" Large filters**

Commercial RO Purifiers

Himajal manufactures the Heavy Duty Water Purifiers with sophisticated quality management systems. The raw materials are verified for durability and corrosion free characteristics. Our In-house R&D facility helps in final verification before client delivery. The customized packaging has helped in the retaining some of the esteemed clients in the competitive market for the product.

Capacity	50-2000LPH
Design	: Customized
Storage	: Customised
Installation Service	: yes
Automation Grade	: Semi-Automatic
Material	: Stainless Steel
RO Membrane	: CSM or DOW
Water Source	: Borewell/River
Technology	: RO+Alkaline

Material Quality

The water purifier is made from high-quality stainless steel, which is durable, corrosion-resistant, and easy to clean. It also features an automatic shut-off function, which helps to conserve energy and prolong the life of the system.

Safe to Use

It comes with a UV inbuilt system that can further sterilize the water, ensuring that it is free from harmful bacteria and other contaminants. Himajal Commercial RO Water Purifier System is a reliable and efficient water purification solution for businesses and organizations that require high-quality purified water on demand.

High-Quality Water

TDS (total dissolved solids) in the purified water, which can help to improve the taste, clarity, and quality of the water. This feature is particularly useful for businesses that require high-quality water for their products or services.

Water Treatment

CHOOSE A WATER SOFTENER THAT SUITS YOUR NEED

Himajal Water Softener comes in different variants. Based on usage and water quality,

AN ALARMING 70% OF WATER IN INDIA IS CLASSIFIED AS HARD WATER!

INTELLIGENT INSIDE

Based on the usage, the water softener automatically selects its function, making it more economical. Just set it and forget it.

LCD DISPLAY PANEL

The Himajal Water softener has an easy-to-read LCD display panel for details of the current settings.

FULLY AUTOMATED REGENERATION

Once set, the water softening media will regenerate itself automatically.

AUTO SETTING LOCK

If electric power to the softner control is lost, internal memory will maintain its previous setting.

Water Softner

Benefits of Softner

- Prevent tap flush, shower head, plumbing line from clogging due to deposition of calcium
- Spotless cleaner around 30% less consumption of water in clothes & utensils
- Reduce consumption around 40% of detergent, soap, shampoo etc
- Smooth & shiny hair
- Soft & clean skin
- Increase the life of RO machine

Sand Filter

Benefits of Sand Filter

- Increase the life of appliances, such as washing machine, water heater, laundry equipments
- Increase the life of shower head, water tap, plumbing line etc.
- Removes suspended particles from water

Carbon Filter

Benefits of Carbon Filter

- Rust and organic sediment particles and stops propagation of bacteria
- Chlorine, pesticides, organic matter, heavy metals, iron, lead, nickel, mercury and arsenic
- Removes bad smell, bacteria and parasites

Iron Filter

Benefits of Iron Filter

- Preserve pipeline, shower head tap, faucets from clogging due to deposition and iron
- Prevent color change of clothes specially white clothes

Algae & Bacteria

Softens
Skin & Hair

HIMAJAL WATER CONDITIONER is the most effective, environment friendly system currently available for hard water. Our system combines the ability to soften the water, ensuring de-scaling in the pipes and most important without using any hard chemicals for cleaning. This helps in improving the life of all the plumbing, nozzles, valves and your domestic appliances

The whirlwind technology is the most advanced method of softening the hard water. The softening process undergoes 3 stage. The powerful magnetic balls disturb the density of the water breaking them into small and micro particles. The three layer plates – Zinc / Brass & Copper inbuilt in the spiral chamber, produces electromagnetic field by creating a centrifugal force, changing the viscosity of the water by crushing minerals into micro particles. And the Infra Red Ceramic & Resin balls conditions the minerals making the water most conducive to use.

- * Softens your hair & make your skin feel fresh.
- * Helps keep bathtub, shower walls and toilet clean.
- * Stops and removes existing scale in pipes & valves
- * Ensures no formation of scales on the floor
- * Increases life of home appliances
- * Most effective on UPVC, HDPE, Copper pipes
- * Reduces usage of soap while bathing, washing utensils
- * Reduces the usage of detergent & makes clothes bright

How it works

Himajal Scalout uses **(EPSR) Electro-Precipitation Scale Removal technology**, which is the most advanced method of softening the hard water. Electrolytic chamber is a DC unit consisting of anode made of Titanium material and cathode made of SS material. Limescale is collected onto cathode as per the chemical process. The deposited scale collected in isolated electrolytic chamber prevent scaling in piping. Scaleout water conditioner is capable of operating with untreated water without the need of chemical additives or other softening methods.

WITH **EPSR**
TECHNOLOGY

Results

Cleaning process of Himajal SCALEOUT is very easy, any one can do it.

SCALE OUT

WATER CONDITIONER

The Electronic Eco-friendly solution
against scaling

Himajal SCALEOUT is the best and cost effective water conditioning system. Himajal SCALEOUT system is fitted inline on the incoming main's of water supply. It removes the lime scale already present in the system, and prevents future buildups. This make sure that not only your home but also your appliances are protected from the damage of formation of lime scale.

CAPACITY

1500 LPH to 15000 LPH & Custom

Electrolytic chamber is a DC unit consisting of anode and cathode made of Titanium material. Scale is collected onto cathode as per the chemical process.

The deposited scale collected in isolated electrolytic chamber does prevent scaling in piping. Scaleout water conditioner is capable of operating with untreated water without the need of chemical additives or other softening methods.

Features & Benefits

- Automatic Control System
- Reduction in scale deposits throughout the piping system
- Inexpensive installation with low maintenance
- Maximized working life of expensive appliances/equipment
- More reliable water supply with retention of essential minerals in the water
